AI-Powered Real-Time Market Tracker

& Daily Finance Briefing Assistant

Live prices • Smart alerts • Buy/Wait guidance • Morning market pulse

The Problem

Constant price-checking

Investors and gold/silver/stock buyers must track prices all day.

Missed timing

They often miss the right moment to buy or sell.

Scattered information

Multiple apps and news sources needed just to understand the morning market.

No clear signal

Still unsure whether "now" is a good time to act.

Who Needs This & Our Goal

Who it helps

- Investors in stocks
- Everyday gold and silver buyers
- Anyone who wants a quick morning market overview

Our goal

- Remove the need to watch prices constantly
- Give clear, simple "buy or wait" guidance
- Deliver one personalized daily briefing

The Solution: One Integrated AI Tool

1

Real-Time Tracking & Alerts

Live gold, silver and stock prices via yfinance with custom alerts.

2

Daily Market Pulse

Personalized morning briefing in simple, plain language.

3

Combined Intelligence

Shared trend and volatility data powers both features.

Step 1: Real-Time Price Tracking

- Track live prices of gold, silver and selected stocks (via yfinance)
- Let the user set custom alerts, e.g. "notify me if gold goes below/above ₹X"
- Use real-time and historical data so alerts reflect the current market

Smart Alerts: Buy Now or Wait?

- When an alert triggers, AI analyzes the short-term trend
- Gives a simple recommendation, not just the raw price
- Volatility and momentum shape the advice

BUY NOW

WAIT

Step 2: Daily Market Pulse Briefing

Gold & silver

Today's rates

Top 3 stocks

Trending today

Sentiment

Bullish or bearish

- Generated automatically every morning
- Written in simple language, like a personal finance briefing, not raw data

Step 3: Combined Intelligence

- The same trend and volatility data powers both the alert bot's buy/wait logic and the briefing's sentiment summary
- Highlights overlap between the two features
- Example: "Your alert on gold is close to triggering, and today's briefing shows gold trending up"

Expected Flow

User sets alert preferences

System tracks live prices

Alert triggers with Buy/Wait advice

Morning market summary auto-generated

Alerts + briefing on one dashboard

Data source: real-time and historical price data via yfinance (gold, silver, stocks).

Deliverable

A working web dashboard where users:

- Set price alerts
- Receive buy/wait recommendations when triggered
- Get a daily AI-generated briefing on prices, trends and sentiment

All from real market data.
